Cascade de Mougious

For a few kilometers discover the natural resources of the valley of Jarjatte, a magnificent site classified by the state since 2012, for the recognition of the picturesque of this place and the work done by all the local actors for its safeguarding.

Take a walk along the trails that will take you to the discovery of the Permafrost de Combe Obscure permafrost and the Mougious waterfall, all with magnificent views of the highest peaks of the Drôme. This hike takes place partly in forest but also at times along a torrent.

Vallon de la Jarjatte (A)

At the foot of the highest summits Drômois and backed up to Dévoluy, the valley of the Jarjatte is a classified site protected since 2012. Between torrent, forest (fir beech forest), alpine pastures and limestone peaks. The meteorology of this sector makes it its richness. The climate of the preharms of the humid north and that of the dry south alps mingle and favor an unusual procession of natural environments.
