

The Grand Veymont from the plateau de Beure

Vercors-Drôme - Saint-Agnan-en-Vercors

(M. Rocheblave)

Go and conquer the Grand Veymont, the main and emblematic summit of the Vercors with its 2,341 meters. This unforgettable walk offers you some of the most beautiful landscapes of the Vercors.

This long hike is one of the most beautiful in the Vercors. You will gradually leave the slopes of the Col de Rousset station to reach the large wilderness of the Hauts-Plateaux du Vercors. The forest gradually gives way to pastures and their bucolic atmosphere. As the climb towards the Grand Veymont, the environment becomes more and more mineral, it is the domain of the ibexes that you will perhaps have the chance to observe. From the summit, the panorama is grand.

Useful information

Practice : By walk

Duration : 11 h

Length : 30.8 km

Trek ascent : 1664 m

Difficulty : Très Difficile

Type : Boucle

Themes : Faune, Flore,
Pastoralisme, Point de vue

All useful information

⚠️ Advices

Please note that you will enter the Hauts-Plateaux du Vercors Nature Reserve, with specific regulations to know and respect!

Be careful, there is no markup on the section of the route that is located in the reserve.

If possible, do not practice this loop in foggy weather and have a compass and 1/25 000 card.

You are on summery areas, maybe you will meet protective dogs, often Patous. Always be sure to bypass the herds, while remaining calm while the dog identifies you, not caressing or threatening them.

Altimetric profile

Min elevation 1391 m
Max elevation 2312 m

On your path...

Cabane de Pré Peyret (A)

At the crossroads of several important trails, the Cabin de Pre Peyret is one of the most frequented of the massif. Located at the entrance of the high plateaus at 1600 m, this unguarded stone hut can accommodate 10 people for the night. It has a stove. The place exudes an old tradition of welcome because it is an old cabaret where those who were penniless went to drink at the Fountain of the Endettés, which bears his name well.
Attribution : PNRV

The Roman quarries (B)

To the north-east of the Pre Peyret hut, on the Queyrie plain, an attentive eye can discover the remains of Roman quarries: fragments of columns, broken rocks ... Nearly 2,000 years ago, The man exploited this hard limestone, cut it on the spot, to descend it to Die by the Pas de Chabrinel. All this with more than rudimentary means

Cabane of Aiguillettes (C)

The cabin of the Aiguillettes is a former shepherd's hut dating back to the time when the pastoral units were smaller. This hut, open to the public, accommodates only 4 people by tightening a little and does not have a stove.

The Grand Veymont (D)

The highest point of the Vercors with its 2341 m, the Grand Veymont dominates the Trièves in the east and the Hauts Plateaux of the Vercors in the west. It is a continuation of the eastern barrier of the Vercors. It is limited to the north by the Pas de la Ville (1925 m), which allows the link between the Hauts-Plateaux and the Trièves, and to the south by the Pas des Chattons (1828 m). Included in the Hauts-Plateaux reserve of the Vercors, it hosts a rich biodiversity, including numerous ibexes.
