Summit of Moucherotte (A)

From its 1,901 meters, this summit offers a breathtaking view of the Alps and the valley of Grenoble. To better locate you in the surrounding massifs, an orientation table is at your disposal on the trail. You will also find on your way a radar of Météo-France. Installed in 2014, it can measure precipitation and wind within a radius of 50 kilometers. Until 2001, the Hotel Ermitage could also be seen standing on the Moucherotte, a luxury establishment that welcomed Brigitte Bardot, Dalida and Charles Aznavour. Abandoned since 1974 for lack of profitability, the hotel was connected to Saint-Nizier by a cable car. Only one pylon remains, which is now used by the village adventure trail.

The plateau of Ramées (B)

This vast, flowery alpine pasture is occupied in summer by village cows, an ancient breed of the Vercors, very adapted to its environment and restored to the taste by some local breeders. The plateau of Ramées, through its alternating wooded areas and alpine pastures, is an environment conducive to the black grouse. You can enter them cooing, but do not try to see them and especially stay on the paths, because this remarkable species is very sensitive to disturbance.
